Re: Obsolescence of DTM65-C

Dear Valued Customer / Partner,

TDK-Lambda has received an EOL notice for the key control IC used in our DTM65-C AC-DC adapters. Without suitable alternative components, we are offering a last time buy for these products. In addition, the US DoE (Department of Energy) released the Level VI energy efficiency standard which has restricted their use in some applications.

In 2018, the next generation DTM65-D was introduced that meets both the DoE Level VI and the EU tier 2 Efficiency requirements. These products share the same case and connectors as the previous generation products and most are direct replacements.

TDK-Lambda recognizes that as a past or current customer of these products, you may require additional units until substitution testing is complete or for service spares. We are offering a last time buy opportunity until November 29<sup>th</sup>, 2019 (subject to availability of the remaining ICs), with a last time ship date of April 30<sup>th</sup>, 2020. Please understand that these orders would be non-cancelable and non-returnable.

Please contact our technical support for additional information. 1-800-526-2324 or email [lambda.techsupport@us.tdk-lambda.com](mailto:lambda.techsupport@us.tdk-lambda.com)

Tom Tillman  
Director of Marketing
